

STANDARDS OF PRACTICE FOR TRAUMA INFORMED CARE

The following Standards of Practice for Trauma Informed Care in Oregon are based on nationally recognized principles of trauma informed care (TIC) and are in alignment with SAMHSA's Concept of Trauma and Guidance for a Trauma-Informed Approach.¹ Each section of the Standards references specific elements in the SAMHSA Guidance document. In addition, the Standards reflect what we are learning about implementation from partners around the state and were reviewed by a workgroup from the Trauma Informed Oregon Collaborative that included family members, youth, and individuals with lived experience as well as providers from different fields of practice. The Standards are intended to provide benchmarks for planning and monitoring progress and a means to highlight accomplishments. We recommend use of this tool by multi-level teams within organizations.

Please keep the following in mind in using the Standards tool:

- 1) The Standards of Practice are intended to help agencies communicate to their constituencies (individuals seeking services, community partners, contracting or funding entities, etc.) how and to what extent they are working to build trauma informed care within their program, clinic, agency or system. This is a voluntary process. We are not attempting at this time to develop metrics or a system of accountability.
- 2) Moreover, there is no assumption that the Standards will be equally useful across all organizations or systems. Culturally specific organizations, for example, may describe how they effectively provide care for trauma survivors in quite different ways than what appears in the Standards. Health care providers also may need different language, and possibly alternative or added Standards as well.
- 3) Individual Standards also will be interpreted differently in different contexts. For this reason, the Standards invite a qualitative (descriptive) response rather than a yes/no answer.
- 4) However, in order to assist agencies to assess strengths and weaknesses and to set goals, we have included a simple set of ratings. These are for internal communication and planning purposes only. The ratings cannot be used to compare one program or agency to another. Note that although the highest rating (4) says "we're stellar in this area," there is always room for improvement, and perspectives may vary depending on who is making the rating.

¹ Substance Abuse and Mental Health Services Administration, *SAHMSA's Concept of Trauma and Guidance for a Trauma-Informed Approach*. HHS Publication NO. (SMA) 14-4884. Rockville, MD: Substance Abuse and Mental Health Services Administration, 2014.

- 5) There is no expectation that an agency or program will be able to respond affirmatively to every item listed. We hope the Standards will support planning and ongoing quality improvement. Furthermore, agencies may be doing any number of other things to create trauma informed care that we have not captured here. Space is provided for this additional information.
- 6) In using the Standards tool for planning, it may be helpful to summarize the self-ratings into areas of strength and areas where work is needed and to consider whether to build on existing strengths (moving ratings from a 2 or 3 to a 4, for example) or to address significant gaps (areas where self-ratings are low). In addition, we strongly encourage efforts to address issues that affect the workforce as well as those that affect individuals seeking or receiving services and to look for low cost/high impact opportunities.
- 7) Finally, we recognize that the experience of individuals seeking services (and of the workforce as well) often comes down to personal interactions that reflect (or don't) sensitivity, respect, caring, transparency, an understanding of trauma, etc. We are not able to capture the quality of those individual interactions in a set of agency-level Standards. We hope that procedures for inviting and using feedback, commitment to training, supervision, and the involvement of individuals with lived experience in the service system(s) will help fill in those gaps. And, again, we encourage the use of this tool to stimulate discussion that includes multiple perspectives and experiences.

The Standards of Practice will be reviewed annually, based on feedback from participating programs, agencies and systems.

Hiring and Onboarding Practices				
IIIf. Screening and interviewing protocols include applicant's understanding and	1	2	3	4
prior experience/training regarding the prevalence and impact of trauma				
and the nature of trauma informed care.				
What questions are asked during the interview process? How do you gauge an				
applicant's ability to respond in a trauma-sensitive way to the individuals you				
serve (some organizations are hiring for 'warmth and emotional intelligence')?				
IIIg. Individuals with lived experience of our service system participate in the	1	2	3	4
hiring process.				
How? How is their feedback utilized?				
IIIh. New employee orientation and training includes the core principles of	1	2	3	4
trauma informed care and affirms the agency's commitment to ongoing				
trauma awareness and education for staff.				
Describe.				
Supervision and Support	1	2	3	4
IIIi. Staff receives regularly scheduled supervision.				
Which staff? How often does this process happen?				
√				
IIIj. Peer Support personnel, whether contracted or on staff, also receive regular	1	2	3	4
support and guidance.				
What is the process?				
TTTL. Companies in alcohol discussion of staff care and colleges	1	2	3	4
IIIk. Supervision includes discussion of staff care and wellness.	_	2	3	4
Describe or provide example. √				
IIII. Supervision includes learning and application of knowledge about Trauma	1	2	3	4
and TIC.				
Example of how this happens?				
Zxample of now this happens. √				
IIIm. Supervisors have had training/consultation on supervising for TIC.	1	2	3	4
When and how does this occur?				
IIIn. Performance reviews expect increased awareness, understanding and	1	2	3	4
practice skills related to trauma informed care.				
Describe.				
√				
IIIo. Supervisors and staff can explain personnel policies; disciplinary actions	1	2	3	4
reflect principles of transparency, predictability, and inclusiveness insofar as				
possible, given legal or contractual considerations.				
Examples of how this is ensured?				

^{*}Substance Abuse and Mental Health Services Administration, *SAHMSA's Concept of Trauma and Guidance for a Trauma-Informed Approach*. HHS Publication NO. (SMA) 14-4884. Rockville, MD: Substance Abuse and Mental Health Services Administration, 2014

IV. Services and Service Delivery. Service delivery reflects a commitment to trauma informed practice [includes activities related to Screening, Assessment, Treatment Services, aspects of Engagement and Involvement, and Cross Sector Collaboration*].

1= we haven't started yet 2= we've done a little 3= we've done quite a bit 4= we're stellar! 2 3 IVa. The first point of contact is as welcoming and engaging as possible for 1 individuals seeking support or services. This includes reducing distress related to referral, self-referral, intake, etc. Describe or provide examples of how this is achieved. IVb. Intake and all direct service staff are able to talk with individuals seeking services about the prevalence and impact of trauma and how it can affect engagement and involvement. How is this information delivered in a trauma informed way? Do you have a script or coaching for staff? 2 IVc. Direct service staff understand the heightened risk of suicide for trauma 3 survivors and are able to respond appropriately and get appropriate help. What is the protocol? What ensures that staff are able to implement? 1 2 3 IVd. Intake forms and processes have been reviewed and modified to reduce unnecessary detail that might be triggering to individuals who are seeking or entering services. What has been modified to improve the intake process for the consumer? 1 2 IVe. Agency has written easy-to-read documentation for staff and service recipients that explain core services, key rules and policies, and process for concerns/complaints. Describe or provide documentation. How it is available in the agency? Note if service recipients have reviewed. 2 IVf. Policies related to treatment services (cancellations, no-shows, other rules) 4 have been reviewed and modified as needed to reflect an understanding of trauma and its impact. What was the review process used? What has happened as a result of these changes?

^{*}Substance Abuse and Mental Health Services Administration, SAHMSA's Concept of Trauma and Guidance for a Trauma-7 Informed Approach. HHS Publication NO. (SMA) 14-4884. Rockville, MD: Substance Abuse and Mental Health Services Administration, 2014

IVg. Individuals receiving services have the opportunity to provide input/feedback and/or to grieve policies that affect them. What is the process or structure for this to happen? How is the process trauma informed?	1	2	3	4
IVh. In organizations providing direct service, the importance of the primary relationship is recognized and supported through policy and practice. How do you work towards continuity of care?	1	2	3	4
IVi. In organizations providing direct service, trauma specific services are offered, preferably reflecting promising or best practices. What services are offered?	1	2	3	4
IVj. In organizations not providing direct services, staff has up-to-date information about trauma specific services available for referrals. How do you ensure this information is available and used?	1	2	3	4
IVk. Peer support is available and routinely offered to individuals receiving services. If yes, what services are offered? What is the role of peers in the organization (paid staff, volunteer)?	1	2	3	4
IVI. Individuals receiving services are not terminated without notice and direct contact (unless precluded by circumstances). How do you ensure this? What's the protocol?	1	2	3	4
Cross-Sector Collaboration IVm. Agency is working with community partners and/or other systems to develop common trauma informed protocols and procedures. Describe efforts and progress in this area, including any shared or cross-training that occurs. √	1	2	3	4

^{*}Substance Abuse and Mental Health Services Administration, SAHMSA's Concept of Trauma and Guidance for a Trauma- 8 Informed Approach. HHS Publication NO. (SMA) 14-4884. Rockville, MD: Substance Abuse and Mental Health Services Administration, 2014 Portland State

V. Systems Change & Progress Monitoring. There is demonstrated commitment to planning, implementation and continuous improvement [includes Progress Monitoring and Quality Assurance, Evaluation, and aspects of Engagement and Involvement*].
