7th Grade Maths Numbers, Number Sense, and Operations - Test Review

Short Answer

1. Isabelle recorded the number of videos rented and returned at MovieLovers, Inc., each hour while working on a Friday night. The table below shows the overall change in the number of videos at the store. What was the average change per hour?

Hour	1	2	3	4
Change in Number of Videos	13	-6	4	7

Evaluate each of the following.

2. $|16 - 28 \div 5| + 1|^2$

3. $70 - 6 \times 6 \div 2 + 8$

Find a fraction equivalent to the given fraction.

4. $\frac{5}{10}$

5. Write $\frac{9}{5}$ as a mixed number in simplest form.

6. A high school basketball team attempted 504 three-point shots last season. They made 140 of those shots. Using a decimal rounded to the nearest thousandth, show the team's success rate for three-point shots.

Evaluate each expression for the given value of the variable.

7. $x - 9 + x$ for $x = 45$

8. $2r^2 + 4r$ for $r = 3$

9. Show that 3.75 is a rational number by writing it as a fraction in simplest form.

10. Express each number by using an exponent and the given base.

5, base 5

11. Pablo is earning money over the summer by caring for cats while people are on vacation. Pablo earns $30 per week per pet. The table shows the number of cats cared for per week during July. Evaluate the expression $(8 + 3 \times 2) \times 30$ to find out how much Pablo earned for the month of July.

Pets Cared for in July

Week	Pets
Week 1	8
Week 2	7

Document Submission

- Standards may be CCSS, Next Generation Science Standards, Oregon or other state standards and/or industry standards
- The number of the standard must be identified on all documents
- School/district designations and personal identifiers should be removed to maintain confidentiality
- BEC accepts documents with the understanding that there is no restriction to posting
- Documents in the Proficiency Portal reflect a variety of approaches
- All documents are posted in original formats
- Additional documents will be added to the Portal as they become available
